Introduction to JN0-210 Exam on Cloud Associate

A great way to start the Juniper Networks Certified Associate Cloud (JNCIA-Cloud) preparation is to begin by properly appreciating the role that syllabus and study guide play in the Juniper JN0-210 certification exam. This study guide is an instrument to get you on the same page with Juniper and understand the nature of the Juniper JNCIA-Cloud exam.

Our team of experts has composed this Juniper JN0-210 exam preparation guide to provide the overview about Juniper Cloud Associate exam, study material, sample questions, practice exam and ways to interpret the exam objectives to help you assess your readiness for the Juniper JNCIA-Cloud exam by identifying prerequisite areas of knowledge. We recommend you to refer the simulation questions and practice test listed in this guide to determine what type of questions will be asked and the level of difficulty that could be tested in the Juniper JNCIA-Cloud certification exam.

Juniper JN0-210 Certification Details:

Exam Name	Cloud Associate
Exam Number	JN0-210 JNCIA-Cloud
Exam Price	$200 USD
Duration	90 minutes
Number of Questions	65
Passing Score	Variable (60-70% Approx.)
Recommended Training	Juniper Networks Cloud Fundamentals (JCF)
Exam Registration	PEARSON VUE
Sample Questions	Juniper JN0-210 Sample Questions
Practice Exam	**Juniper Networks Certified Associate Cloud Practice Test**

Juniper JN0-210 Exam Syllabus:

Section	Objectives
Cloud Architectures	Identify the concepts or functionality of various fundamental elements of cloud networking - Public, private, and hybrid clouds - XaaS: Components offered as services in a cloud environment - Underlay versus overlay
NFV	Identify the concepts, benefits or functionality of network function virtualization - vMX, vSRX, and NFX use cases - NFV framework - VNFs
SDN	Identify the concepts, operation or functionality of software-defined networking - SDN types - Contrail Cloud/Networking - OpenStack - NSX - Orchestration - Automation
SDN WAN	Identify the architectural elements of Juniper Networks WAN SDN solutions - NorthStar - WANDL
Cloud Monitoring	Identify Juniper Networks methods of analyzing cloud networking operations or devices - AppFormix (for example, smart networks) - Telemetry - Alerts - Contrail analytics
Cloud Managed Services	Identify Juniper Networks cloud services solutions or components - CSO - vCPE/NFV: Distributed, centralized - SD-WAN - ZTP
Cloud Security	Identify the concepts or functionality of securing cloud networks - SDSN - Sky ATP - Security Director - Cyphort

_____

JN0-210 Sample Questions:

01. Which method does WANDL use to collect live network information?
a) FTP
b) SOAP
c) TFTP
d) SNMP

02. The vMX Series provides which two benefits?
(Choose two.)
a) The vMX Series uses containerization technology for rapid service enablement.
b) The vMX Series uses carrier-grade routing optimized for the x86 environment.
c) The vMX Series requires a license for production environments.
d) The vMX Series uses a Trio ASIC.

03. Which protocol is used to transport monitoring data in Juniper's open and extensible data model?
a) TCP
b) SNMP
c) SOAP
d) UDP

04. What are two components of the Juniper Networks SDSN solution?
(Choose two.)
a) manual secure policy control
b) dynamic VPN connections
c) enforcement everywhere on the network
d) centralized management

05. From where does AppFormix gather performance metrics in a network?
a) from an agent on a host or system
b) from a NETCONF connection
c) from RPM probes sent across the network
d) from statistics NFVs instantiated in the data path

06. Which CSO component enables customers to manage sites and services for their organizations?
a) Administration Portal
b) Customer Portal
c) Designer Tools
d) Service and Infrastructure Monitor

07. According to Juniper Networks, what is the recommended external routing protocol for the underlay network?
a) EGP
b) IS-IS
c) BGP
d) OSPF

_____

08. Which type of service would allow you to provision five servers with Windows Server 2016 installed?
a) IaaS
b) PaaS
c) SaaS
d) FWaaS

09. In which two scenarios is Contrail used?
(Choose two.)
a) private cloud networking
b) network hardware lifecycle management
c) Network Functions Virtualization
d) policy-based routing

10. What are two roles of sandboxing in Sky ATP?
(Choose two.)
a) to test the operation of security rules
b) to validate the operation of third-party components
c) to analyze the behavior of potential security threats
d) to store infected files for further analysis

Answers to JN0-210 Exam Questions:

Question: 01	Question: 02	Question: 03	Question: 04	Question: 05
Answer: d	Answer: b, c	Answer: d	Answer: c, d	Answer: a
Question: 06	Question: 07	Question: 08	Question: 09	Question: 10
Answer: b	Answer: c	Answer: b	Answer: a, c	Answer: c, d
